DETAILED ACTION

1. The claim is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim is narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim must be in one sentence form only. Note the format of the claims in the patents cited.

The functional recitation "Improved accessibility to bags and/or contents as a result of liner descent/ascent feature" is indefinite because it is not supported by recitation in the claim of sufficient structure to accomplish the function.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The claim is rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,082,171 to Homel et al.

Art Unit: 3727

Homel discloses a liner having descent/ascent feature. Furthermore, the liner of Homel et al. is disclosed as being made from a flexible material, which would inherently make it capable of taking the shape of any receptacle.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
